

Microsoft®
Forefront™

Unified Access Gateway 2010

Secure Apps & SSL-VPN for everyone

The sensational starter price of € 2,990.- Euro (recommended net retail price) gives you a complete SSL-VPN solution which offers more than conventional solutions do.

Mobile employees – mobile devices

More and more companies have mobile employees, business partners or customers requiring access to internal company data and applications.

SecureGUARD offers an **appliance** which meets these requirements excellently and can be integrated into the company infrastructure in an optimum way. This appliance is able to **publish** a wide range of applications (such as **Exchange**, **Sharepoint**, **Citrix**, and **Terminal Server**) with a large number of ready-made templates quickly, easily and reliably.

Optimum use of user rights

Granular user administration allows an exact distinction to be made between different user groups, partners and customers. The integrated **End Point Security** allows various different user rights depending on the end device with which the user logs on, regardless of whether he does it from the company computer, from home or en route via Smartphone.

Microsoft DirectAccess with Windows 7 - Secured

The base of the UAG Starter Edition - **Microsoft Forefront Unified Access Gateway 2010** - is also the only way to provide and scale **Microsoft DirectAccess** with the necessary security. In conjunction with **Windows 7**, DirectAccess allows users with company laptops to be connected to the corporate network automatically and securely at all times whenever there is access to the Internet.

SecureGUARD UAG STARTER Edition

Small & powerful

The STARTER Edition includes deployment, management, disaster recovery and configuration tools which make life easier for administrators.

Flexible & communicative

The new SecureGUARD STARTER Edition is at its most impressive in conjunction with the Microsoft applications **Exchange**, **OWA**, **Active Directory**, **Sharepoint** and **Terminal Server**.

Versatile

Additional software from third-party manufacturers can be installed via the management interface, turning the STARTER series into a universal security platform.
